UI Design Concept Planning
Project Proposal with Strategies

A. Current Status

Content

- Stakeholder missing pages of most common types of pets.
- In the current state audience is limited to cat and dog owners, providing more content will enable the website to serve more people.

Functionality

- Stakeholders requested an online form to book one-on-one services, currently there is no form available.
- There is a search bar function that is not operational audience trying to navigate this feature will find this frustrating.

Navigation

- Stakeholder requests an easy to navigate website, navigational buttons do not currently link to correct locations.
- Audience will become frustrated with improperly linked toolbar.

B1. Engagement

Schedule time with our Pexperts

Owner Information:

Email:

Phone Number:

Time Zone:

Pet Information:

Name:

Type of Pet:

Age:

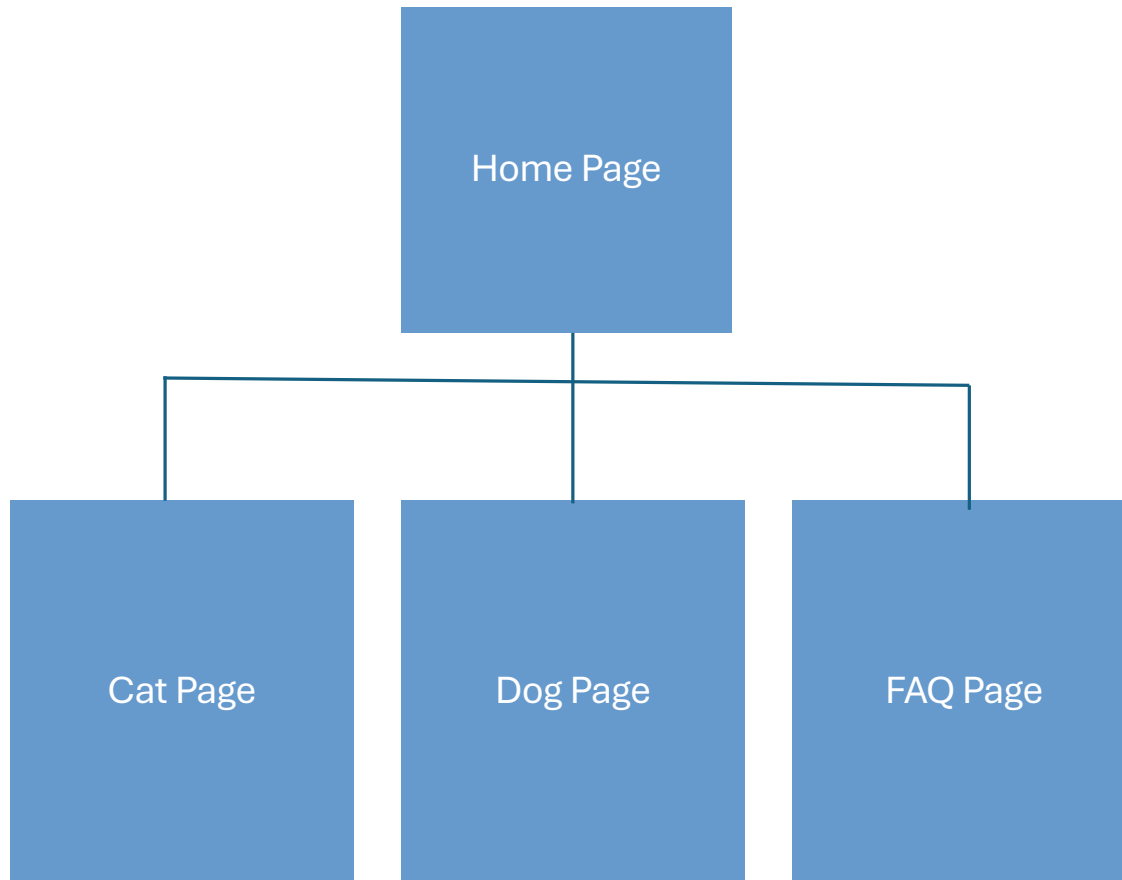

Functionality/Microinteraction

-As requested by the stakeholders, the Home page will have a clearly visible online form available for audience to interact with immediately.

-In addition, a secondary link will be created on the navigation bar for clear and easy referral back to the online form. Stakeholder requested increased audience interaction with clear data requirements.

-Microinteractions found throughout the website will be color changes on links when audience hovers over manipulative elements .

B3. Current Site Map

-Stakeholder expectation is dedicated pages for most common type of pets.

-Most common User/Audience identified as cat owners, dog owners, bird owners, fish owners, and small-animal owners.

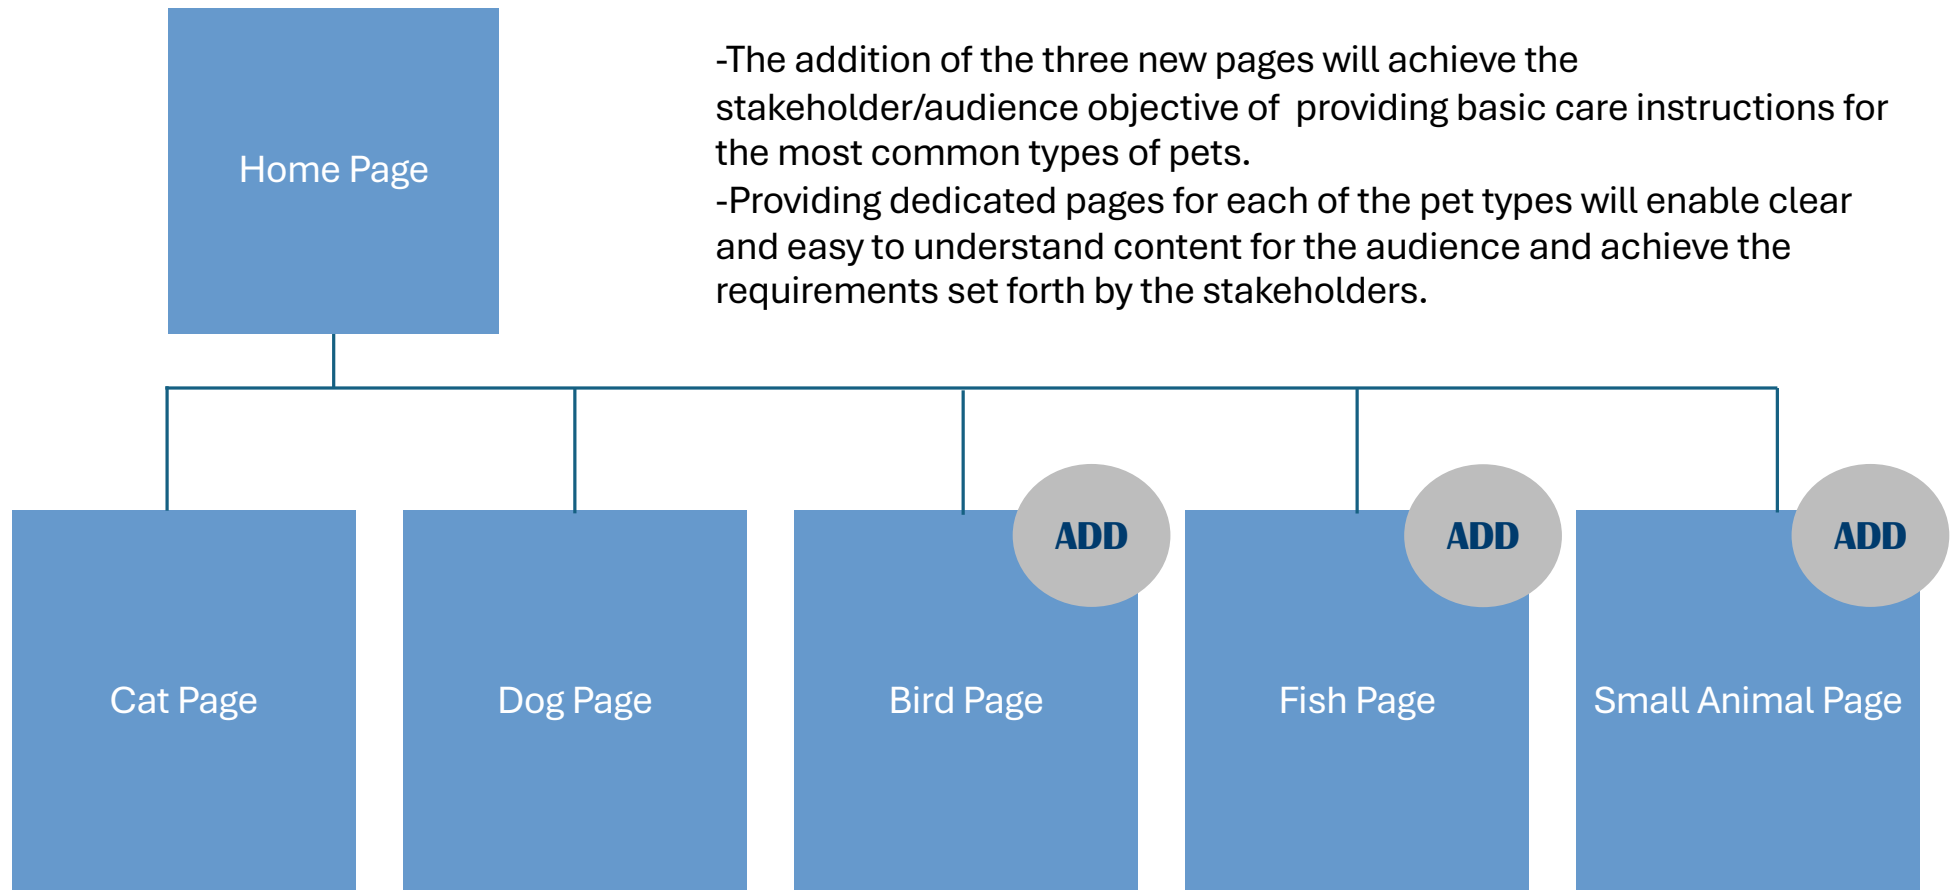

-FAQ contains information of three types of pets and therefor does not meet stakeholder expectations.

-FAQ will be removed and replaced with three additional dedicated pet types: bird owner, fish owner, and small-animal. Dedicated pages will better achieve the expectations of the audience.

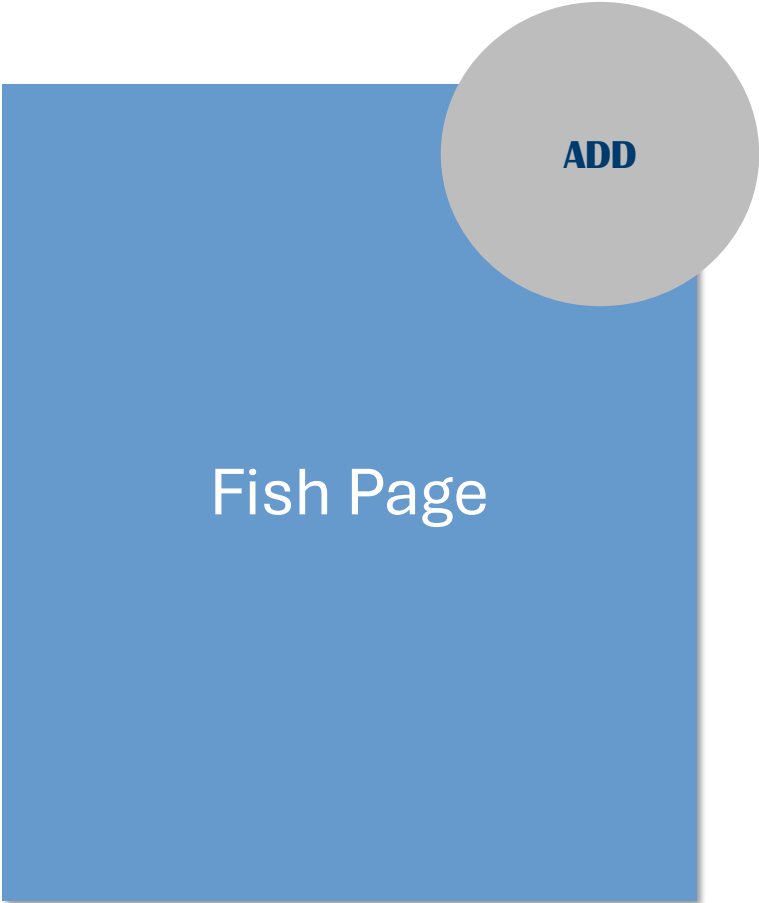

-Home Page and navigation bar will be updated to include easy to navigate “Pexperts” sign up form this will achieve the stakeholders expectation of data collection they have set forth.

-Redevelopment of the Home, Cat, and Dog pages to more adequately meet the navigation expectation of audiences by correcting miss linked hyperlinks and giving the pages an overall more modern and clear design format.

B4/5. New Site Map & Information Architecture

B2. New Page User Personas

ADD

Fish Page

-Fish Pet audience are most concerned with the levels and maintenance of the water for their specific type of fish.

-A link to establishing a “pexpert” one-on-one consultation will also be provided. For new fish audience having the consultation will help these new clients feel comfortable navigating the establishment of their water for their aquarium.

-Newly added fish page will include:

- Freshwater Fish

 - pH Levels

 - Ammonia

 - Nitrates

 - Nitrites

- Saltwater Fish

 - Salinity

 - pH Levels

 - Ammonia

 - Nitrates

 - Nitrites

B6. Navigation

Fish

Secondary Navigation

- Stakeholder requested increased user navigation options, including links in the body inserted within the content will supplement the primary navigation bar.
- While audiences prefer click navigation having links in the body as an option will increase audience user experience.

Primary Navigation

- Stakeholder requested easy to navigate content which a navigation bar will achieve by providing direct page access by a single click.
- Audiences prefer click navigation, providing direct links to the content the audience is looking for will increase user satisfaction.

D. Maintenance Plan

1. Efforts to ensure universal accessibility to all site content

- Use of semantic HTML, alternative text for images utilized by screen readers.
 - Responsibility of **Web Development Team** – checked once a quarter or full review after redesign
- Validate my code with W3C, and test site on different web browsers.
 - Responsibility of **Web Development Team** – checked once a quarter or as needed based on business.

2. The relationship between written content and SEO

- Search engines use all text content on website to determine whether your page is an appropriate return for a users search.
 - Responsibility of **Web Design Team** – deep analytics after initial release to ensure content is appropriate, check quarterly or as needed based on business during maintenance period.
- Additional tags and search phrases can be added to titles, alt text and meta tags to increase search engines returning you as a relevant return.
 - Responsibility of **Web Development Team** – checked quarterly and/or full review after redesign/content addition.

3. Tasks required to properly maintain the website

- Update and add additional content to maintain relevance and accuracy.
 - Responsibility of **Web Design Team** – once a quarter or as needed based on business
- Update coding to maintain hyperlinks, optimal performance and security standards.
 - Responsibility of **Web Development Team** - once a quarter or as needed based on business

4. Plan for rendering the website on desktop and mobile devices

- Use responsive design key frame to deliver content based on viewport width.
 - Responsibility of **Web Development Team** - once a quarter and/or after content add/redesign
- Adjust content on Home Page, navigation header and footer for smallest viewport size.
 - Responsibility of **Web Design Team** – once a quarter and/or during redesign ensure designs for mobile.

5. SEO strategies for mobile devices

- Check Google site speed, ensuring page loads under 4/secs
 - Responsibility of **Web Development Team** - once a quarter and/or after content add/redesign
- Use responsive design to change/limit features such as pop ups on small viewports.
 - Responsibility of **Web Design Team** – once a quarter and during redesign ensure designs for mobile
